Guilherme Von Ancken

Front-End Developer | AI Agent Creator | Automation Architect
São Paulo, São Paulo, Brazil

Summary

Passionate about building intelligent and seamless digital experiences, I blend my expertise in front-end development with cutting-edge AI automation to create next-gen applications and agents.

With a solid background in front-end technologies (HTML, CSS, JavaScript, SAP), I'm now focused on crafting AI-powered agents and automation systems that boost productivity and solve real-world problems.

I specialize in:

AI Agent architecture (OpenAI, LangChain, AutoGPT, etc.)

Workflow automation (N8N, Make, Zapier)

Front-end interfaces that interact with AI models

I'm currently building solutions that bridge the gap between human intent and machine execution. Let's connect if you're working at the intersection of tech, AI, and automation!

Experience

GVA

Frontend Developer / AI Agent Creator / Automation Architect
February 2024 - Present (1 year 5 months)

Designing, building, and deploying intelligent AI agents and automations for a variety of use cases using tools like OpenAI APIs, LangChain, Make, N8N and custom front-end interfaces. Current focus: leveraging AI to automate decision-making and repetitive workflows.
